
1.8GHz Wireless Transceiver Module

Version History

Version	Date	Changes
V1.01	May.09, 2002	1 st . Edition

TRW-1800 is high frequency transceiver module and good stability and reliability. FSK RF Data Transceiver Module .High Sensitivity Passive Design . Application to: Wireless security systems, household automation, remote systems, atomize reading, long distance remote and wireless phone.

SPEC

- Frequency Range : 1881.792~1897.344MHz
- Modulate Mode : FSK
- Circuit Shape : PLL
- Data Rate : >1Mbps
- Power Output : +24dBm
- Selectivity : -92dBm
- Supply Voltage : 4.75~5.25V
- Non-Operating Case Temperature : -10 ~ +70 °C
- Soldering Temperature : 230 °C(10 Seconds)
- High Sensitivity Passive Design
